SUMMARY

Graduate Data Scientist passionate about artificial intelligence and applying data-driven thinking to real-world problems. With an MSc in Data Science and a BSc in Computer Science (AI), I bring a strong technical foundation in data manipulation, modeling, and visualization, complemented by hands-on project and internship experience. Autonomous, curious, and collaborative, I'm looking to apply my skills to meaningful, high-impact work.

EDUCATION

MSc Data Science and Advanced Computing	University of Reading	2024 – 2025 United Kingdom
- Thesis in “Vehicle Re-Identification using Masked Autoencoders” - Acted as Course Representative, representing student interests at staff-student liaison meetings and helping address academic and administrative concerns raised by peers - Active member of the Reading Consulting Society, tackling business cases such as a CGI challenge to develop a technology-driven decarbonisation strategy for a global energy company, assessing sustainability impact, costs and implementation challenges		
BSc Computer Science (Artificial Intelligence)	Brunel University London	2020 – 2023 United Kingdom
- Specialism in Artificial Intelligence - Final Project in “Flower identification through convolutional neural networks”		

TECHNICAL SKILLS

Languages	: Python, Java, R, SQL, JavaScript, C++, Bash
Libraries	: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, SciPy, Matplotlib, Seaborn
Data Analysis	: KNIME, IBM SPSS, Power BI, Microsoft Excel
Big Data & Cloud	: Hadoop, Azure, Databricks
Tools	: Git, Github, Linux, MySQL

EXPERIENCE

Data & Information Intern , Awenza Health	Sep 2026 – Present Remote
- Analyzed live, continuous muscle-performance data captured by Awenza’s DIMT platform, a non-invasive wearable sensor system for physical rehabilitation - Worked with Sentinel, the platform’s clinical data visualization software, to examine patient progression trends and clinical KPIs for therapists - Supported Sage, Awenza’s AI predictive analytics model, preparing and evaluating sensor data used in its ML training pipeline - Developed and tested enterprise software and data solutions for rehabilitation clinic partners, helping automate clinical workflows and deliver actionable insights	
Data Analyst Intern , AS Distribution	Oct 2023 – Dec 2023 Marrakech
- Managed and updated customer, supplier, and shipment databases using the company’s internal JavaScript-based web application, ensuring data accuracy and consistency - Tracked shipment statuses to support timely coordination between import/export operations and logistics teams - Collaborated with team members to identify and resolve data discrepancies, improving reporting reliability	

NOTABLE PROJECTS

<u>Car Park Occupancy Forecasting</u> Python, Pandas, LightGBM, XGBoost, Prophet
Cleaned 35k+ sensor readings and built a LightGBM model that forecasts car park occupancy, beating a baseline by 56%.
<u>Wheat Seeds Clustering & Classification</u> Python, Scikit-learn, Pandas, Seaborn
Compared clustering methods for wheat varieties, then built a 94.3% accurate classifier.
<u>Heart Disease Data Preprocessing</u> KNIME
Cleaned and explored 920 patient records in KNIME, choosing not to impute missing medical values.

ADDITIONAL INFORMATION

Languages: Fluent in English, French, Arabic; intermediate in Spanish Co-organized <u>First EthicalAI’s</u> inaugural event, “Risky Data: Co-creating an Ethical AI Framework” Guest speaker, <u>American School of Marrakech</u> — presented on university life and Computer Science to final-year high school students Attended <u>GITEX Africa 2024</u>, exploring emerging trends in AI and technology through exhibitor showcases and industry talks
